

I urge you reject NAB's petition 04-160. I am an XM Radio subscriber, and listen to local radio as well. If XM is able to provide better local coverage than local stations, I will listen to local coverage on XM. As long as the local stations provide better coverage, I will continue to listen to local stations. Competition is good for the industry. The FCC should be more concerned by the Clear Channel monolith than XM

Thank you.
